# PERMACHLOR AC

200AC | 400AC | 800AC | 1200AC

**AC is the chlorinator best suited for swimming pool water with high calcium, iron and other mineral content.**

**PermaChlor AC produces sodium hypochlorite by electrolysis.**

**SALT + WATER + DIRECT CURRENT = SODIUM HYPOCHLORITE**

---

### PRODUCT DESCRIPTION

The salty pool water (min. 0.4 %) is pumped into the system and hypochlorite is produced using electrolysis. The hypochlorite is injected into the main circulation pipe. The control cabinet monitors the production of the hypochlorite with the help of signals from the pool's monitoring equipment. The AC machine is automatically cleaned using 9 % hydrochloric acid.

## INCLUDED IN THE DELIVERY

## TECHNICAL DATA

Model	Cl <sub>2</sub> (kg/24h)	Cl <sub>2</sub> (g/h)	Salt content min %	Power usage (kW)
200AC	4,8	200	0,4	1,8
400AC	9,6	400	0,4	2,4
800AC	19,2	800	0,4	4,8
1200AC	27,6	1200	0,4	7,2
