

CHLORALKALI ELECTROLYZER MANUFACTURING & RECOATING

Permascand AB is a leading supplier specializing in the manufacture, refurbishment, and recoating of electrolyzers for the chloralkali industry delivering customized solutions worldwide for over 45 years.

OUR DEDICATED TEAM OF ELECTROCHEMICAL EXPERTS, ENGINEERS, AND TECHNICIANS HAVE THE KNOW-HOW AND EXPERIENCE TO HELP YOU TO MAXIMIZE THE LIFE OF THE HEART OF YOUR PLANT...

THE CHLORALKALI CELLS.

A decorative graphic in the bottom left corner consisting of a grid of overlapping teal and light blue diamond shapes, creating a geometric pattern.

Permascand's new computer-controlled coating line started 2015 is the most advanced process in the world today. Electrostatic coating application and heat treatment is closely monitored and controlled at all times to maximize coating yield, efficiency, quality, and minimize cost.

AUTOMATED COATING TECHNOLOGY FOR PERFORMANCE AND EFFICIENCY

Our workshop in Sweden is comprising more than 7000 m² of the latest factory automation systems carefully blended with the human touch. Our equipment includes:

- LASER WELDING (TRUMPH TRULASER CELL 7020)
- PLASMA WELDING
- AUTOMATED WELDING MACHINES (TIG, MIG AND MULTIPOINT SPOT WELDING)
- CNC MACHINING AND PUNCHING
- SURFACE PREPARATION AND HEAT TREATMENT

With our main office and automated manufacturing and electrode coating facility located in the heartland of Ljungaverk, Sweden, we provide global reach with a local touch. Our North American customers have the convenience of a licensed workshop located in Louisiana with customer sales & service support from Vancouver, Canada.

COMPANY HISTORY

Permascand started in 1971 as a joint venture between KemaNord of Sweden and DeNora of Italy. Permascand was owned by Eka Chemicals and the AkzoNobel Group up to 2012 when it became a private company with a sharp customer focus.

What makes our company truly unique is our people. We have a team of more than 100 with the experience, discipline, energy, and problem solving ability to tackle any challenge. Our team includes electrochemical research and development specialists, designers, and project managers to ensure that we meet our customer's expectations throughout the product life cycle.
